

TCA 35% + MULTI-ACIDS PEELING SOLUTION

VITAMIN B12 + RETINOL REJUVENATING COMPLEX SQUALENE OIL BIXA ORELLANA SEED OIL BIPHASIC TECHNOLOGY

### **Component Structure**

- Proline, Glycine and Hydro proline are twisted into a spiral, which forms collagen molecules in triple helical structures.
- When collagen molecules combine, it becomes collagen threads. When collagen threads combine, it becomes collagen fibers.
- Collagen has a strong, twisted, rope-shaped and cannot be absorbed due to a large molecular weight of more than 300,000 Dalton.
- Three types of peptides, parts of a collagen molecular structure, are absorbable in small units (Proline, Glycine and Hydro proline) of less than 500 months.
- Molecular structures maintained in the form of Proline, Glycine and Hydro proline deliver and are absorbed into the skin.
- Molecular structure is maintained in a low molecular weight structure and delivers to the skin, so it leads to good absorption and maximized efficacy.

# **ULTRA SHINING PEEL** (2ml - 7minutes)

### **Effects**

Various ingredients are included that promote collagen production such as AHA, PHA, BHA glycine proline, vitamin C and vitamin B2 which are effective filling for whitening and anti-ageing.

### **Method**

Shake enough to mix the oil-layer and the water-layer and extract 2ml by inserting a needle in the middle.

Then, use a dedicated brush or hands(necessary wearing gloves)

After that, apply it on T-Zone', and then use on 'U-zone'.

After 7 minutes of the application, wipe off with a wet disposable sponge.

### TCA35% + Multi Acid Peeling

TCA35% + AHA, PHA, BHA

(Glycolic Acid, Lacto Bionic Acid, Salicylic Acid) minimize skin irritation and bring maximum effectiveness.

# Medical Herb Peeling without Skin Irritation

The good combination of 3 peptides and peeling formula it brings great effects without pain, swelling, erythema, stinging and other irritations. With just 3 times of treatments, you will see very pleasant results.

6ml x 5vial

#### **Transparent Oil Layer**

Various whitening substances prevent oxidation and the degeneration of active ingredients of which leads to better effects. It protects the skin by forming an oil moisture film and stabilizes stable peeling components to achieve safe peeling without worrying about side effects.

### **Yellow Water Layer**

Amino acids, including AHA, BHA, PHA, Vitamin B12 and Retinol components are mixed and optimized as a mixed layer. It shows not only whitening but also deep skin components that stimulate and activate cells to show dramatic treatment effects.

# **ULTRA SHINING PEEL Features** and Main Components

#### **Features**

- Through a stable formula with a double layer, it reduces stimulation and maximizes the effect.
- Vitamin C reduces melanin synthesis and quickly decomposes free radicals to prevent tyrosinase activity.
- The Lactobionic Acid(PHA), having a strong anti-ageing effect strengthens the skin barrier and increases the production of Glycosaminoglycan(GAG) to enhance skin volume and elasticity.
- Hydroxyproline multiplies keratin cells and maximizes the production of collagen fibers.
- The peeling ampoule can be used in any part of the body.
- It is a traditional face-only peeling product such as elbows, groin, armpits, and atopic care. It is also very effective for skin pigmentation, stretch marks on the body, etc.

#### **Main Components**

**TCA 35%** 

AHA

**PHA** 

**BHA** 

**Vitamin C** 

**Proline** 

Vitamin B12

Retinol

**Glycine** 

## HOW TO USE

2) Shake to mix the oil layer and water layer

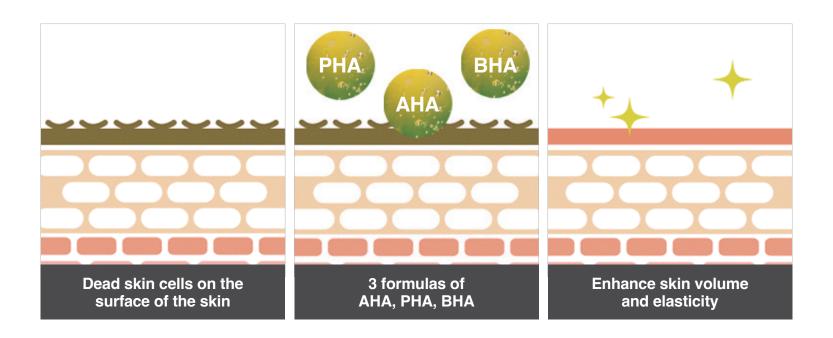

3) Extract by inserting a lid in the middle

• Shake enough to mix the oil-layer and the water-layer after that extract 2 ml by inserting a needle in the middle. (Recommend using 17G NEEDLES)

- Use a dedicated brush or gloved hands and apply it in the order of T-Zone and U-zone.
  - After 7 minutes of the application wipe off with a wet disposable sponge.

## **ACTIVE INGREDIENT**

#### TCA + AHA + BHA + PHA

Stratum corneum denaturation and proteolysis of epidermal proteins

### PROLINE + VITAMIN C + VITAMIN B12 + GLYCINE + RETINOL

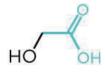

Penetration and delivery of collagen and vitamins

### **SQIALENE + ARGININE**

Filming and regenerating action

## **ACTIVE INGREDIENT**

#### **AHA**

Keratolysis, exfoliation, increasing gloss and shine, cell turnover promotion, mucopolysaccharide increase in dermis (Increase of water absorption) Increase of density of collagen, improvement of elastic fibers.

#### PHA

Pull the moisture and increase the moisture supply to strengthen skin barrier, active oxygen absorption, included antioxident components (ideal for sensitive skin), relieved erythema, brightening, skin barrier strengthening, photo aging improvement, wrinkle improvement, lubrication, exfoliation effect and hypoallergenic for sensitive skins.

#### **BHA**

Reducing dead skin cells on the skin surface, acting on follicle sebum and peeling pores, anti-inflammatory effects, improving face cloth, removing blemishes and reducing fine wrinkles.

#### **VITAMIN B12**

- Cobalamin keeps the skin healthy and balances hormones. It also keeps nerve cells healthy.
- · Helps produce DNA and RNA.

#### **VITAMIN C**

Active inhibition of Melanin pigment, inhibition of Tyrosinase, promotion of Collagen production, prevention and reduction of PIH, strong antioxidant action, wrinkle reduction, control of active oxygen.

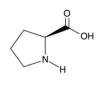

#### VITAMIN B2 (Reviflavin)

Helping anti-ageing, cell regeneration or energy metabolism through antioxidant function. Strengthening skin, hair and nails, promoting growth, and suppressing active oxygen to prevent ageing.

#### **Retinol**

• Produce collagen production of the dermis, inhibition of collagen decomposition and normalization of the epidermis.

## **ACTIVE INGREDIENT**

#### **PROLINE**

It takes up 1/6 of the collagen (2/3 of the collagen with the Hydro proline), decomposing the protein to regenerate the connective tissue of the cells, increasing skin elasticity, reducing wrinkles, helping to create collagen by contacting with vitamin C, strengthening immunity, improving antioxidant conditions and promoting metabolism.

#### **GLYCINE**

Promoting collagen synthesis, which is a key component of cell regeneration, helping joint health, promoting metabolism (help nourishing mitochondria) and stabilizing nervous system.

 $NH$ 
 $NH$ 
 $NH_2$ 
 $NH_2$ 

#### **Arginine**

• Antioxidant function, Immune System Control, Wound healing and removal of edema (pouring) and brightening after improving blood circulation.

#### **Aminobutyric Acid**

· Antioxidant components, Active growth hormone secretion, neurotransmitter, toxins absorption to emit it.

#### **Squalene**

• It is natural antioxidant and great for skin barrier support, suppleness, hydration, and texture improvements.

## PROTOCOL

- 1. Recommend starting moisture and regeneration cares 3 days after SHINING PEEL treatment.
- 2. Do not forcedly remove the dead skin cells.
- 3. The skin will look dark before the dead skin cells are completely exfoliated.

  But, the skin becomes brighter when the dead skin cells are completely removed.
- 4. Do not give too much irritation before treatment.
- 5. When treating atopic dermatitis, divide the treatment time: the 1st SHINING PEEL for 5 minutes and the 2nd SHINING PEEL for 5 minutes.

### **PROTOCOL**

### Ultra shining peel protocol of use

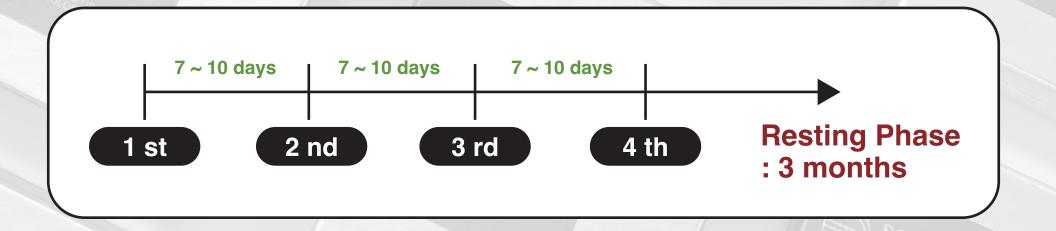

- 1. Clean the zone of interest with specific detersion products (acetone, surfactants...)
- 2. Shake the ampoule for a few seconds until colour turn green for a temporary emulsion.
- 3. Using a syringe, prelate the quantity of product for the treatment without removing the butyl stopper.
- 4. Apply the product with nitrile gloves until it is completely absorbed.
- 5. Let the product performs:
  - i. 3-NFD: NECK, FACE, DECOLLETE' 3/5 minutes
  - ii. BODY: HANDS, KNEES, ELBOWS, GLUTES, FEET 5/10 minutes
  - iii. It is possible to treat every body zone up to doctor's discreption.
- 6. Clean the zone with a gauze soaked with water.

THE REPORT OF THE PERSON AND THE PER	3-NFD	Volume mL
	Neck	1 ~ 1.5
Made Su	Face	1.5 ~ 2
	Decolleté	2 ~ 2.5

- Ultra Shining peel applied every 7/12 days for 4 to 6 times.

### **PROTOCOL**

## Recommended Treatment Period of Ultra Shining Peel

# Improvement of Acne & Pore tightening 3 times treatment of Ultra Shining Peel.

# Improvement of Acne & Pore tightening 3 times treatment of Ultra Shining Peel.

### Improvement of Pore tightening & Skin tone

2 times treatment of Ultra Shining Peel.

### Remove dead skin cells

1 time treatment of Ultra Shining

### **Melanin pigment improvement**

2 times treatment of Ultra Shining Peel.

### **Atopic dermatitis**

3 times treatment of Ultra Shining

### Wrinkle elasticity & Melanin pigment

3 times treatment of Ultra Shining Peel.

# SPECIFICATIONS & INDICATIONS

Ultra Shining Peel	
24 month	
Skin Revitalisation, Treats acute Acne, Black heads, Post Acne Scarring, wrinkle reduction, Treatment of melanosis and skin pigmentation, Treatment of enlarged pores and oily skin, Can also be combined with other Aesthetic Treatment.	
Between 2~25°C. Protect from direct sunlight and freezing.	
1box / 5vials, 6ml / vial	
Neck (recommended amount: 1~1.5ml) Face (recommended amount: 1.5~2ml) Decollete (recommended amount: 2~2.5ml) Hands (recommended amount: 2~3ml) Elbows
